Does the Belt & Road Initiative affect electrification levels?

Learn more. Electrification is crucial for achieving global net zero emissions and reducing energy poverty, particularly in developing countries involved in the Belt and Road Initiative (BRI). This study uses the difference-in-differences method to examine the BRI's impact on electrification levels in 118 countries from 2009 to 2020.

How much is China engaged in the Belt & Road Initiative?

Preliminary data on Chinese engagement through financial investments and contractual cooperation for 2024 in the 149 countries of the Belt and Road Initiative show about 340 deals worth USD121.8 billion. This compares to USD 92.3 billion BRI engagement in all of 2023 - an increase of 31%.

Will the Belt & Road Initiative reshape global supply chains?

As the global economy experiences significant changes marked by increased disruptions and escalating geopolitical tensions, the Belt and Road Initiative (BRI) is expected to assume a crucial role in reshaping global supply chains.

How Green was China's energy engagement in 2024?

(Image: David Gubler | Wikimedia Commons) China's energy-related engagement in 2024 again set a record as the greenest since the BRI's inception in 2013: in 2024, China's green (solar, wind, waste-to-energy) energy engagement was about USD 11.8 billion, about 30% of China's total energy engagement, plus an additional USD639 million in hydropower.
