---

Field will finance, build and operate the renewable energy infrastructure we need to reach net zero -- starting with battery storage.

The European Market Monitor on Energy Storage covers different energy storage technologies and markets, allowing industry players and other experts to stay up-to-date on ...

The European Energy Storage Market Monitor (EMMES) updates the analysis of the European energy storage market (including household ...

The fleet of energy storage projects in Europe, including both pumped hydro and battery energy storage systems of all sizes, is ...

The 9.5 edition of the European Market Monitor on Energy Storage (EMMES) by the Energy Storage Europe Association and LCP Delta, is now ...

Almost twelve gigawatts (GW) of new electricity storage systems were installed in Europe last year, bringing the cumulative total capacity to 89 GW. The dominant storage ...

The EMMES provides a robust evidence base to inform the energy storage debate on a European and member state level, and to help educate important stakeholders about storage and its ...

The report provides insights into the energy storage landscape, with data and analysis across 3 market segments: residential, commercial & industrial, and utility-scale storage. 89 GW of ...

The report provides insights into the energy storage landscape, with data and analysis across 3 market segments: residential, commercial & industrial, ...

The 9.5 edition of the European Market Monitor on Energy Storage (EMMES) by the Energy Storage Europe Association and LCP Delta, is now available. The EU, UK, Norway, and ...

The report provides insights into the energy storage landscape, with data and analysis across 3 market segments: residential, commercial & industrial, and utility-scale storage.

The latest edition of the report titled European Market Monitor on Energy Storage (EMMES) finds that 2024 has been a record year for energy storage deployment. Pumped ...

Almost twelve gigawatts (GW) of new electricity storage systems were installed in Europe last year, bringing the cumulative total ...

The European energy storage market contracted in 2019 to 1 GWh, with a cumulative installed base of 3.4 GWh across all segments. However, the future of energy storage in 2020 in ...

EASE's Jacopo Tosoni explains how energy storage is rapidly redefining Europe's energy system and reinforcing energy security.

Spanish and Portuguese utility Endesa, part of Enel, has provisionally won 953MW of connection rights to build renewable energy resources and battery storage in the Spanish city of Andorra, ...

Combining on-site renewable energy sources and thermal energy storage systems can lead to significant reductions in carbon emissions and operational costs for building owners. Learn ...

A total of 11.9GW of energy storage across all scales and technologies was installed in Europe in 2024, LCP Delta has said.
