Can battery energy storage systems transform business in the Philippines?

Battery Energy Storage Systems have the potential to transform how commercial and industrial companies in the Philippines manage their energy needs. With benefits ranging from cost reduction to energy supply stability, BESS is a compelling solution. While the initial investment may vary, the long-term advantages are undeniable.

What is Bess & how does it work in the Philippines?

For commercial and industrial companies in the Philippines, BESS provides an opportunity to take control of their energy usage. These systems consist of high-capacity lithium-ion batteries and sophisticated energy management software.

How is Bess transforming the Philippine energy industry?

With the commercial operations of approximately 1,000 MW of BESS facilities across 32 locations in the Philippines, we are now ushering in a new era for the Philippine energy industry through significant improvements in grid reliability and the integration of more renewable power sources to the country's diverse energy mix.

What is Masinloc battery energy storage?

We started our venture into battery energy storage technology in 2018 when we acquired the 10 MW Masinloc Battery Energy Storage System (BESS) of the Masinloc Power Plant from AES Philippines. The Masinloc BESS is the first battery energy storage facility in the Philippines and one of the first in Southeast Asia.

The Masinloc BESS is the first battery energy storage facility in the Philippines and one of the first in Southeast Asia. Our acquisition of ...

The first ever solar-plus-storage hybrid resources system in the Philippines is now in operation after energy
