Module X Solutions designs, engineers, & manufactures modular telecommunication equipment shelters to industry and client-specific ...

Our charging interface can be customized to support 48V output, making it suitable for heavy-duty trucks, large excavators, and low-voltage industrial equipment commonly used on construction ...

Explore durable outdoor cabinets and enclosures engineered for protection, performance, and reliability in demanding environments.

That same truck could also charge other smaller vehicles on-site, such as excavators, bulldozers, and cranes. Field equipment powered by bi-directional charging ...

BackgroundUnattended base stations require an intelligent cooling system because of the strain they are exposed to. The sensitive telecom ...

Purcell Systems responds with highly configurable, thermally managed outdoor rack enclosure solutions that address all power, thermal, acoustic, cabling, and quality requirements.

This article introduces the concept of bidirectional charging, exploring benefits such as cost savings, improved energy efficiency, and ...

Our telecommunications enclosures feature durable construction from materials like stainless steel or aluminum to protect network equipment ...

The CUBE product line incorporates design flexibility to quickly customize dimensions and functionality.

When combined with our optimized manufacturing facilities, customers get a fast ...

Conclusion Bidirectional charging EV represents a significant advancement in electric vehicle technology, transforming EVs into versatile energy ...

What is commonly missed in NFPA 72 is that the rooms which contain the BDA signal booster panel are also required to be located within a 2-hour fire-resistance rated ...

Versatile installation features: Our enclosures have two universal wall and pole mounting brackets and an adjustable and removable back plate. This construction allows for smooth installation ...

This article introduces the concept of bidirectional charging, exploring benefits such as cost savings, improved energy efficiency, and enhanced grid stability. It also delves into how this ...

Designed for outdoor enclosures, harsh environment electronic cabinets, battery cabinets and more, the Outdoor Cooler Series combines superior heat pumping capability with minimal ...

2025100554 - 2025-10-13 - NOE - No Utility Upgrades Required: Designated, Bi-directional L2 Charging for Multi-Family Housing Units in Disadvantaged and Low-...

There are huge differences between indoor and outdoor telecom enclosures. We're going to break the differences down into three ...

The project utilized a fleet of five electric excavators and three electric telehandlers, equipped with bi-directional charging capabilities. During peak construction hours ...

The project utilized a fleet of five electric excavators and three electric telehandlers, equipped with bi-directional charging capabilities. ...
