What types of batteries can be transported by air?

You will encounter two main types when transporting lithium batteries by air: lithium ion batteries and lithium metal batteries. Lithium ion batteries, often used in consumer electronics like laptops and smartphones, are rechargeable and have a typical energy density of 160-270Wh/kg for NMC Lithium battery and 180-230Wh/kg for LCO Lithium battery.

Should lithium batteries be shipped by air?

Regulations for shipping lithium batteries by air are in place to protect everyone who would come in contact with a lithium battery shipment while it is being transported as air cargo; with training being required for everyone in this supply chain, to protect the aircraft, and the people in the aircraft, that is carrying the batteries.

Are lithium batteries safe in air cargo?

Failure to comply may result in shipment rejection or legal action. These regulations help you safely ship lithium batteries and reduce fire risks in air cargo. Always use UN 38.3 certified lithium batteries and follow IATA packaging and labeling rules to ensure safe and legal air shipment.

Can I ship lithium ion batteries on cargo aircraft only?

You must ship these batteries on cargo aircraft only. This rule applies to both lithium-ion and lithium metal batteries shipped without equipment. Cargo Aircraft Only (CAO) Label: You must affix a CAO label to every package containing standalone lithium batteries.

But there's good news: Lithium-ion batteries can be shipped safely by air if shippers take proper precautions.

Here's what to know in regard to lithium battery shipping by air for all shippers, freight forwarders and ground operation personnel.

Master lithium-ion battery shipping regulations. Explore UN3480, UN3481, IATA air transport, IMDG sea freight rules, and safe packaging tips. The power source known as the lithium-ion ...

Fortunately, this type of qualified packaging is readily available and pre-qualified from suppliers globally. Download the infographic In ...

But there's good news: Lithium-ion batteries can be shipped safely by air if shippers take proper precautions. As with all hazardous goods, safely shipping lithium-ion batteries by air requires ...

Discover Saphion's expert tips on how to transport lithium batteries safely. Secure your custom lithium battery packs with our safe ...

Shipping lithium-based batteries by air requires strict compliance with IATA, UN 38.3, and carrier rules for safe, legal, and penalty-free transport.

Why do we need to ship lithium batteries by air? Researching can lithium-ion batteries be shipped by air has become an increasingly ...

Lithium-ion batteries can be shipped around the world; however, some transportation methods will have different rules. For ...

General Key takeaways UN3480 and UN3481 cover different scenarios: batteries shipped alone versus batteries shipped with or ...

Why do we need to ship lithium batteries by air? Researching can lithium-ion batteries be shipped by air has become an increasingly pressing problem. This is because of ...

Shipping lithium batteries has become a common practice due to the increasing demand for portable electronic devices, electric vehicles, and renewable energy storage. ...

But there is good news: Lithium-ion batteries can be shipped safely by air if shippers take proper precautions. As with all hazardous goods, safely shipping lithium-ion ...

In the modern technological landscape, lithium batteries have emerged as the lifeblood of countless devices, powering everything from our everyday smartphones and ...

The Carriage of Electric Vehicles, Lithium-Ion Batteries, and Battery Energy Storage Systems by Seas Executive Summary The rapid global adoption of electric vehicles (EVs), ...
