-----  
**Is solar power a new energy source in Costa Rica?**

Like wind power, solar power is another newer energy source in the country. The first solar power projects in the country were established in 1978 by just a few researchers from public universities at the Solar Power Laboratory at the National University. During 2012, Costa Rica inaugurated the Miravalles Solar Plant next to the Miravalles Volcano.

**How much energy does Costa Rica produce?**

The project's totaling was \$11.5 million (\$10 million from JICA and \$1.5 million from ICE. This plant of 1MW only represents 0.03% of all the capacity installed in the country. Currently, Costa Rica generates less than 1% of its energy production using solar power. The rest of the production is 79% Hydro, 12% Wind and 8% Geothermal.

**Does Costa Rica have a monopoly on electricity?**

Explore oil and gas export opportunities and the regulatory environment in Costa Rica. The Costa Rican Institute of Electricity (ICE) holds a monopoly over electricity distribution and generation in Costa Rica. There are some exceptions where other public institutions and co-operatives are authorized by law to generate and sell electricity.

**Why is Costa Rica a good country?**

As a country, Costa Rica has a geographic advantage over others in that its high concentration per capita of rivers, dams, and volcanoes allow for a high renewable energy output. In addition, Costa Rica is the fourth highest nation in terms of rainfall per capita: it receives an average of 2,926mm of precipitation per year.
