-----

The Minnesota Department of Commerce seeks to work with and facilitate connections with local and Tribal governments, utilities, businesses, communities and other entities interested in ...

As the industry transitions towards more automated and precision-driven manufacturing processes, demand for advanced equipment has surged, further fueling growth ...

Given the high energy need for producing green electrolytic hydrogen, it is important to carefully evaluate hydrogen's effect on the ...

The North American market for new energy and power equipment structural parts presents a compelling strategic opportunity for industry players seeking sustainable growth and ...

The Secretary of Commerce initiated investigations under Section 232 of the Trade Expansion Act of 1962 to determine the effects on the national ...

Liquid air energy storage could be the lowest-cost solution for ensuring a reliable power supply on a future grid dominated by carbon-free yet intermittent energy sources, ...

Building on nearly a decade of successful manufacturing and global deployments of high-performance batteries, SimpliPhi is introducing a dynamic and scalable PHI High ...

Commercial energy storage comes with a lot of benefits for commercial and industrial customers. Learn the different types that are ...

Outdated and energy-intensive heating and cooling equipment will be replaced to reduce energy consumption

and emissions. ...

Unlocking its secrets could thus enable advances in efficient energy production, electronics cooling, water desalination, medical diagnostics, and more. "Boiling is important for ...

Giving people better data about their energy use, plus some coaching, can help them substantially reduce their consumption and costs, according to a study by MIT ...

Taiwan's Innovative Green Economy Roadmap (TIGER) is a two-year program with the MIT Energy Initiative, exploring ways that industry and government can promote and adopt ...

In MIT course 15.366 (Climate and Energy Ventures) student teams select a technology and determine the best path for its commercialization in the energy sector.

MIT engineers developed a membrane that filters the components of crude oil by their molecular size, an advance that could dramatically reduce the amount of energy needed ...

As MIT's first vice president for energy and climate, Evelyn Wang is working to broaden MIT's research portfolio, scale up existing innovations, seek new breakthroughs, and ...

Review key energy provisions in the House's budget reconciliation bill, including proposals from multiple committees and ...

The industry also wants incentives for both stand-alone storage and storage paired with renewable energy, but the commission's ...

At the MIT Energy Initiative's Annual Research Conference, speakers highlighted the need for collective action in a durable energy transition capable of withstanding obstacles.
