The project was equipped with a complete set of energy storage solutions, advanced storage equipment, overall commissioning, and technical support provided by China Power New ...

AES brings 1 GW of solar + storage online in California, and full buildout will be the largest of its kind in the US by 2026.

The project includes a 75-megawatt (MW) solar power facility paired with 75 MW of battery storage capacity that can operate for up to eight hours. Spanning approximately 622 ...

Highview surpasses half a billion pounds of funding with latest \$130m capital raise for phase one of long duration energy storage facility at Hunterston, Ayrshire Highview Power announces two ...

The project provides power for 135,000 homes and has created an estimated 400 construction jobs. The electricity generated from the 300 MW solar project, combined with a ...

The projects selected will support the development of LDES solutions paired with renewable energy generation in disadvantaged communities, resulting in reduced emissions, ...

The U.S. has 431 operational battery energy storage projects, 8 using lead-acid, lithium-ion, nickel-based, sodium-based, and flow batteries. 10 These projects totaled 27 GW of rated ...

Non-wired Eos storage ensures critical supply during outages and congestion on today's networks--and the transition to tomorrow's infrastructure. Through self-owned ...

APPA created this guide to help public power utility leaders to build business cases for implementing energy storage solutions. This guide provides an outline of how a utility might ...

Highview surpasses half a billion pounds of funding with latest £130m capital raise for phase one of long duration energy storage facility at Hunterston, ...

The Electric Power Research Institute (EPRI) conducts research, development, and demonstration projects for the benefit of the public in the United States and internationally. As ...

Enterprise energy storage projects contribute significantly to sustainability efforts by enhancing energy efficiency, integrating renewable energy, and promoting grid resilience.

Between December 2024 and March 2025 two projects--one jointly owned by EDF Renewables and Power Sustainable Energy Infrastructure (PSEI) and another with ...

Let's face it - planning an enterprise power storage project is like assembling IKEA furniture without the instruction manual. You might end up with something functional, but ...

Accelerated by DOE initiatives, multiple tax credits under the Bipartisan Infrastructure Law and Inflation Reduction Act, and decarbonization goals across the public and private sectors, ...

The Honeycomb portfolio, which includes the Enterprise Solar, Escalante, Granite Mountain E, and Iron Springs installations, will collectively store up to 1,280 MWh of ...

Support CleanTechnica's work through a Substack subscription or on Stripe. Solar power and battery storage projects continue to grow strong around the world, in the US, and in ...

Greenflash secures battery storage capacity to reduce power risk and accelerate time-to-power for data centers across U.S. markets.
