What does the Commission see in digital networks?

The Commission is seeing a transformation in digital networks. It sees, for example [p. 4] in the equipment sector, there is a trend towards software and cloud-based networks and open architectures. On the other, risks due to new dependencies (e.g. in the case of cloud infrastructure and services).

Why should European telecom operators invest in the networks of the future?

If European telecom operators are able to reap the full benefits of these technologies, the networks of the future will greatly contribute to the EU policy ambitions to enable autonomous, resilient, and sustainable networks that secure digital sovereignty and industry competitiveness.

What are EU policies on connectivity?

EU policies on connectivity aim at harmonising connectivity regulations to foster cross-EU services and expanding networks. These objectives derive from the Digital Decade connectivity goals: European households should have access to high-speed internet coverage by 2025 and gigabit connectivity by 2030.
