What is the Africa minigrids program?

The Africa Minigrids Program (AMP) aims to transform energy markets by leveraging solar-battery minigrids to enhance economic development and improve livelihoods through increased financial investment and innovative business models. #MinigridsForAfrica New Report Demystifies Interconnected Minigrids Find out more

Are minigrids a viable investment option in Africa?

Today, the minigrid market in Africa remains nascent, with the private sector facing a range of barriers holding back investment. Except in a few markets, nearly all current investment in minigrids is in the form of grants and noncommercial, patient capital.

Are mini-grids a good solution for rural sub-Saharan Africa?

Compared to centralised grids, mini-grids have the potential to provide a lower-cost, quicker-to-market solution. And in rural sub-Saharan Africa, where over 75% of households do not have access to grid electricity, mini-grids can help to address the issue of household connectivity.

Will Africa have a mini-grid with battery storage?

Few utilities in Africa have built mini-grids with battery storage. As mini-grids will be owned by utilities, there is no competition when the grid arrives in an area. In addition, permitting is likely to be less of a challenge for public authorities.
