How has DRC benefited from a grant-making and concessional financing scheme?

DRC has benefited from several grant-making and concessional financing schemes that have helped to unlock private capital for the off-grid solar sector. In 2021, the Swedish investment platform (Trine) entered a partnership with Altech, a leading company in the distribution sustainable energy products and services¹⁸.

How will the DRC meet the ELEC-Tricity challenge?

The DRC aims to connect 32% of the country to electricity by 2030. Meeting this challenge will require co-ordinated efforts from various stakeholders, supportive policies and regulations, and technical assistance support to prospective projects in order to attract investments.

How much e-waste does the DRC produce?

The DRC is expected to produce 16,050 tons of electrical and electronic waste, according to a study carried out by the Belgian group, Groupe One. There are currently no regulations or legislative frameworks concerning e-waste.

What is the role of Anser & are in the DRC?

To strengthen legal and regulatory framework and catalyze private and public investment flow to the sector (including off-grid solar energy), the DRC government established two agencies: ARE, which will be the autonomous regulatory agency; and ANSER, which is responsible for rural electrification throughout the DRC's vast territory.

The Universal Energy Facility (UEF) - a multi-donor results-based financing facility managed by Sustainable Energy for All (SEforALL) - is signing several grant agreements with ...
