How much does a 20kW Solar System cost in Australia?

Across Australia, a quality 20 kW array installed on a standard iron or tiled roof with no major upgrades falls between \$15 000 and \$22 000, including GST and the federal STC incentive. That headline range converts to roughly \$750 - \$1 100 per installed kilowatt. How many panels are in a 20kW solar system? How much area is required?

Is a 20kW Solar System a good investment?

A 20kW solar system will potentially generate enough solar to power your business, pay for the system cost, and be a profitable investment in a few years. With households & businesses facing increasing pressure from rising grid electricity prices, clean and affordable energy is within reach. How much does a 20kW solar system cost in Australia?

What is a 20kW Solar System?

By taking advantage of Australia's abundant sunshine, a 20kW system helps you lower your carbon footprint while keeping your energy supply stable and reliable. How much will a 20kW solar system cost? The cost of a 20kW solar system can vary based on factors like where you live, the structure of your roof, and how much energy you typically use.

How much does a 20 kW solar system cost?

In 2016, a 20 kW array routinely cost ~ \$32 000 (? \$1.60 /W), matching the \$1.62 /W national average recorded that December. By mid-2025, bulk pricing sits near \$0.90 /W, halving nominal system cost to ~ \$18 000. The drop stems from cheaper modules, a stronger STC market, and intense installer competition.
