-----  
How much does international container shipping cost?

International container shipping costs typically range from \$2,000 to \$6,000 for full container loads (FCL). Shipping a 20ft container ranges from \$2,800 to \$15,600, and a 40ft container from \$1,865 to \$23,415, depending on the route. Partial container shipping (LCL) is a cost-effective option for smaller moves, averaging around \$1,600.

How much does a 20 ft shipping container cost?

The current average used 20 ft shipping container costs between \$1,500 and \$3,000, and a new 20 ft container costs between \$2,500 and \$5,000. Used 40ft shipping containers cost on average \$2,000 to \$4,500 for standard and \$2,500 to \$5,000 for a 40 ft high cube, while new 40ft containers cost \$3,500 to \$6,500 and \$4,000 to \$7,000, respectively.

Are new shipping containers more expensive than used?

New containers are typically more expensive as they are in perfect condition and ready for long-term use. Used containers are less costly but have some wear and tear. Shipping container sizes and prices are directly linked to each other. The price also depends on how well the container has been maintained over time.

What is a used shipping container condition rating?

Used container condition ratings include Cargo Worthy (CW), Wind & Watertight (WWT), or As-is. Here's a breakdown of the cost for used shipping containers: CW containers can be certified for export shipping, meaning they can withstand the rigors of sea travel, and all of the major steamship lines will accept them for transit on their ships.
