How many wind projects are there in Pakistan?

Currently, 36 private wind projects are operating, producing approximately 1845 MW. The Government of Pakistan renewable energy (RE) policy envisages generating 60 percent of the country's energy from renewable resources by 2030. The ambitious target provides several opportunities for the wind energy market in Pakistan.

Does Pakistan have a wind energy corridor?

The GoP has developed a wind power energy corridor along the southern coastal regions of Sindh and Baluchistan. Wind data, provided by Pakistan's Meteorological Department, measures Pakistan's coastal belt at 60 km (Gharo-Keti Bandar) and 180 km long, with an exploitable potential of 50,000 MW of electricity generation through wind turbines.

How many solar projects are operational in Pakistan?

According to the Private Power & Infrastructure Board (PPIB) of the Ministry of Energy, seven solar projects of 530 MW are operational and supplying electricity to the national grid. With the rising costs of electricity in Pakistan and an unreliable grid supply, more industries and commercial organizations are turning to captive solar solutions.

How much does a wind turbine cost in 2022?

In 2022, materials (43.5 per cent) and labour (18.2 per cent) constituted the largest share of wind turbine costs. According to the Draft National Electricity Plan 2022, the capital cost of solar power and wind power projects is expected to reach Rs 53.3 million per MW and Rs 77.9 million per MW respectively by 2031-32.

The growth of solar and wind power capacities depends largely on their cost and tariff trends. Various domestic policies and global shocks have impacted these two factors. ...
