Who owns a 100MW battery energy storage system in Sweden?

UK-headquartered utility Centrica has acquired a 100MW battery energy storage system (BESS) portfolio in Sweden from Swiss developer and independent power producer (IPP) Fu-Gen AG. The projects will be deployed in the SE3 region, which includes Stockholm and surrounding areas, and the first of them will become operational in 2026.

Who is responsible for Sweden's energy grid connection?

At the time, Sweden's Minister of Climate and Environment, Romina Pourmokhtari, was responsible for overseeing the grid connection. In comments at the ceremony, Pourmokhtari said, 'It is a great honour to launch the largest investment in energy storage in the Nordics, with 211 MW of electricity currently connected to the grid.'

How many large battery storage systems are deploying in Sweden?

Fourteen large battery storage systems (BESS) have come online in Sweden, deploying 211 MW/211 MWh for the region. Developer and optimiser Ingrid Capacity and storage owner-operator BW ESS have been working together to deliver 14 large BESS projects across the Swedish grid in tariff zones SE3 and SE4.

Is Elektra the largest battery storage project in Sweden?

However, neither of these projects had been completed and energised when RES launched the Elektra energy storage project in late April, a 20 MW/20 MWh project billed as Sweden's largest battery storage project at the time.

Commercial energy storage comes with a lot of benefits for commercial and industrial customers. Learn the different types that are ...

But neither were built and energized by the time RES switched on the Elektra Energy Storage Project, a 20

MW / 20 MWh project, called ...

This event will bring together key stakeholders from across the region to explore the latest trends in energy storage, with a focus on ...

Developer and optimiser Ingrid Capacity and storage owner-operator BW ESS have been working together to deliver 14 large BESS projects across the Swedish grid in tariff ...

C& I: A growing energy storage market In 2017, only 4.3% of battery storage deployment could be classified as for commercial and industrial (C& I) use. Nevertheless, the sector has only ...

This event will bring together key stakeholders from across the region to explore the latest trends in energy storage, with a focus on the increasing integration of energy storage ...

In this article, we explore three business models for commercial and industrial energy storage: owner-owned investment, energy management ...

This reduces the risk of power cuts. In the event of a power cut, energy storage can provide backup power, ensuring that critical infrastructure, ...

China's industrial and commercial energy storage is poised for robust growth after showing great market potential in 2023, yet critical ...

The rapid growth in the energy storage market continues to drive demand for project financing, and like any other project-financed asset class, lenders will analyze both the amount and ...

To support grid stability, Sweden is actively investing in energy storage systems to provide ancillary services, such as Frequency Containment Reserve (FFR) and Frequency ...

Our latest overview of the top 20 battery energy storage projects in Sweden reveals a market that has shifted from cautious pilot activity to industrial-scale deployment in ...

Swedish energy storage company Ingrid Capacity, the market leader in the Nordics, secures approx. SEK 1bn of investments from BW Energy Storage Systems (BW ESS), a part of BW ...

US energy storage set a Q1 record in 2025 with 2 GW added, but looming policy changes could put that growth at serious risk.

Explore cutting-edge energy storage solutions in grid-connected systems. Learn how advanced battery
