Are solar panels required in Tokyo?

All new detached houses in Tokyo after April 2025 are required to have solar panels installed. However, if you are purchasing a property in a different part of Japan, it's possible that solar panels may not be mandated in the region.

How has Japan benefited from a new solar energy facility?

The Japanese government has introduced several specialised programs to facilitate this growth. One of the key existing programs is the feed-in tariff, which guarantees the purchase of electricity from a new solar energy facility at a set price for a number of years.

Can I install solar panels on my property?

Check local building codes and zoning laws about the rules for installing solar panels on your property. We recommend contacting your local ward office for detailed information regarding incentives and tax breaks when installing solar panels.

Does mailmate offer solar panel maintenance?

Some solar companies will offer solar panel maintenance as part of your total cost or as an additional service. Schedule solar maintenance, yard work, and regular cleaning with MailMate. No more miscommunication in Japanese.
