Where is Indonesia's New battery plant located?

The battery plant, located in Karawang, West Java, represents a \$5.9 billion investment. Key stakeholders include Indonesia Battery Corporation (IBC), mining giant Aneka Tambang, CATL, Brunp Recycling (a CATL subsidiary), and Chinese battery materials producer Lygend Resources. The facility is designed with capacity of up to 15 gigawatts (GW).

Will China build a lithium-ion battery plant in Indonesia?

China's REPT Battero has revealed plans to build a lithium-ion battery plant in Indonesia, targeting 8 GWh of annual production capacity in the first phase. From ESS News Hong Kong-listed REPT Battero has announced plans to invest in a new battery production facility in Indonesia.

Will Indonesia's lithium-ion battery facility be operational in 2026?

According to an Indonesian official on Sunday, a lithium-ion battery facility that is being developed by an Indonesia battery business and China's CATL is anticipated to be operational by the end of 2026, with an initial capacity of 6.9 gigawatt hours.

Can Indonesia build a battery factory?

In October 2024, CATL and Indonesia's IBC (a consortium composed of four Indonesian state-owned enterprises) established a joint venture for battery cell manufacturing. The two sides committed to investing \$1.18 billion to build a battery factory with an annual capacity of 15GWh.
