-----

A large increase in the UK's energy storage will be critical to ensuring the UK reaches its goal of a clean power system by 2030, with a tenth of generated wind power ...

This could see the first significant long duration electricity storage (LDES) facilities in nearly 4 decades, helping to create back up ...

In this Energy-Storage.news roundup, Hydrostor receives permitting approval for its California project, Hawaiian Electric is set to begin construction on ...

Our report highlights the clear benefits of investing in long-duration storage, including energy and economic security, avoiding waste of renewable electricity, and allowing ...

Jinjiang 100 MWh energy storage power station projectContemporary Amperex Technology Co., Limited (CATL) is a global leader in new ...

The London Energy Storage Plan, set for official unveiling on November 15, 2025, promises to tackle energy volatility like a proverbial umbrella in a British rainstorm.

A new era for renewable power and energy security begins today (Tuesday 8 April) as Ofgem launches a new cap and floor investment support scheme, unlocking billions in ...

Co-located energy storage has the potential to provide direct benefits arising from integrating that technology with one or more aspects of fossil thermal power systems to improve plant ...

The facility will serve as a large-scale battery energy storage system capable of charging from, and

discharging into, the New York ...

This provides a user guide to the London Energy Plan interactive map which shows the spatial trends for each of these scenarios across a variety of data layers ranging from heat demand, ...

The decentralised energy system model was initially developed as part of a comprehensive assessment of low carbon energy potential in London (Buro Happold and Camco, 2011) - ...

A large increase in the UK's energy storage will be critical to ensuring the UK reaches its goal of a clean power system by 2030, with a ...

Brockwell Energy said its site had been chosen as it was near existing power lines and close to an agreed National Grid connection near ...

Two of the 2.5GWh plants will deliver more storage than all of the UK's existing battery storage, using 100% sustainable technology, with a 40-year lifespan. The addition of ...

The Department of Business, Energy and Industrial Strategy in the UK has given the green light to the country's biggest ever battery storage project.

Highview Power, a global leader in long-duration energy storage solutions, today announced plans to construct the UK's first commercial cryogenic energy storage facility (also referred to ...

"The grid-side energy storage power station is a "smart regulator" for urban electricity, which can flexibly adjust grid resources," Tesla said on Weibo, according to a ...

The 300MW Thurrock Storage project, developed by Statera Energy, is now energised and delivering electricity flexibly to the network across London and the south east.
