Will a battery energy storage system improve Delhi's power distribution system?

Mainstreaming a battery energy storage system at the distribution transformer level will better integrate renewable energy sources and contribute to a more disaster-resilient power distribution system for Delhi," said ADB's Director General for Private Sector Operations Suzanne Gaboury.

Who commissioned India's first standalone battery energy storage system?

India's first commercial standalone battery energy storage system (BESS) project with a 20MW/40MWh capacity at the distribution company level and a tariff approved by the electricity regulatory authority has been commissioned by power sector infrastructure investment trust IndiGrid in Delhi.

What is India's energy storage capacity?

India's total BESS capacity reached 219.1 MWh as of March 2024, according to Mercom India Research's report, India's Energy Storage Landscape.

How much battery energy will India need in 2022?

In 2022 India's Ministry of Power targeted battery storage capacity of 4% of total electricity consumption by 2030. To reach that goal, India would need a total battery energy storage capacity of 182 gigawatt-hours by 2030.
