---

Energy can be stored through a variety of forms, including batteries, thermal, hydrogen, pumped hydro, flywheels, and compressed air. The Inflation Reduction Act's (IRA) tax credits for ...

China new energy storage capacity more than double by 2030 China new energy storage capacity at 73.76 million kW/168 million kWh ...

The global energy storage market is poised to hit new heights yet again in 2025. Despite policy changes and uncertainty in the world's two largest markets, the US and China, ...

The New Energy Outlook presents BloombergNEF's long-term energy and climate scenarios for the transition to a low-carbon economy. Anchored in ...

Grid-scale storage installations are forecasted to reach 13.3 GW in 2025. "After another year of record deployment, energy storage is ...

The U.S. energy storage market set a record for quarterly growth in Q2 2025, with 5.6 gigawatts (GW) of installations, according to the latest U.S. Energy Storage Monitor report ...

In 2024 alone, China added 42.37 GW/101.13 GWh of new storage capacity (excluding pumped hydro), with an average discharge ...

Most of the growth was driven by California, Arizona, and Illinois, as attachment rates hit new highs and higher-capacity systems gained market share. Community-scale, ...

BEIJING, Jan. 24 (Xinhua) -- China's new energy storage sector has seen a rapid growth in 2024, with installed capacity surpassing 70 million kilowatts, said an official with the National Energy ...

US energy storage set a Q1 record in 2025 with 2 GW added, but looming policy changes could put that growth at serious risk.

Until recently, the focus of the energy transition has primarily been on retiring legacy fossil generators and adding more renewables and energy storage that can sustain electrification ...

The global energy storage market almost tripled in 2023, the largest year-on-year gain on record, and that growth is expected to continue.

Not all energy storage technologies and markets could be addressed in this report. Due to the wide array of energy technologies, market niches, and data availability issues, this market ...

Storage deployment in the United States grew across all segments and is forecast to grow another 25% in 2025, according to Wood Mackenzie. Across all segments, including ...

HOUSTON/WASHINGTON, D.C. June 25, 2025 -- According to the new U.S. Energy Storage Monitor developed by Wood Mackenzie ...

China's new energy storage sector has seen a rapid growth in 2024, with installed capacity surpassing 70 million kilowatts, said an official with the National Energy ...

All net new generating capacity in 2026 is forecast to be provided by renewables and batteries, according to new EIA data.

This additional storage capacity is helping meet increasing energy demand and is supporting growing industries like manufacturing ...
