On August 19, 2025, the 10th Western China Energy Storage Forum grandly opened in Hohhot, Inner Mongolia. This forum was hosted by the China Energy Research Society, China Energy ...

Developers expect to bring more than 300 utility-scale battery storage projects on line in the United States by 2025, and around 50% of the planned capacity installations will be ...

In the near term, the report projects that 15 GW/49 GWh of energy storage capacity will be installed across all segments in 2025. The utility-scale segment is expected to ...

As of June 2025, the China Energy Storage Alliance (CNESA) reports that China has amassed approximately 164 GW of total ...

Although developers have added natural gas-fired capacity each year since then, other technologies such as wind, solar, and battery storage have become more prevalent ...

145 MW of community-scale, commercial and industrial (CCI) storage was installed in 2024, a 22% increase over the previous year. ...

The record solar installation figures helped drive more than 50GW of total renewable energy capacity additions in 2024, with the wind ...

The U.S. energy storage market set a record for quarterly growth in Q2 2025, with 5.6 GW of installations, according to the latest U.S. Energy Storage Monitor report released ...

New York State aims to reach 1,500 MW of energy storage by 2025 and 6,000 MW by 2030. Energy storage is essential for creating a cleaner, more efficient, and resilient electric grid.

Total U.S. installed battery storage capacity surpassed 39 gigawatts in 2025, a 43% increase from 2024, according to energy data portal Cleanview.

The U.S. utility-scale energy storage market led the way, adding 1.5 GW/4 GWh of capacity in Q1 2025 for a 57% increase over the same period last year. The residential storage ...

By the end of the first half of 2025, China's new-type energy storage had maintained a stable and rapid growth trajectory. The total installed capacity reached 94.91 GW / 222 ...

BEIJING, Jan. 24 (Xinhua) -- China's new energy storage sector has seen a rapid growth in 2024, with installed capacity surpassing 70 million kilowatts, said an official with the National Energy ...

The American Clean Power Association reported that the United States added a record 1,602-MW of battery storage capacity in the first quarter of 2025, equivalent to the ...

Last year was fantastic for battery storage. This year is poised to be even better. The U.S. is set to plug over 18 gigawatts of new utility-scale energy storage capacity into the ...

The U.S. utility-scale energy storage market led the way, adding 1.5 GW/4 GWh of capacity in Q1 2025 for a 57% increase over the ...

US energy storage set a Q1 record in 2025 with 2 GW added, but looming policy changes could put that growth at serious risk.

In the near term, the report expects 15 GW/49 GWh of new storage capacity to be installed across all segments in 2025, with utility-scale installations projected to grow 22% year ...
