-----

Summary: Bergen's push toward renewable energy integration makes containerized energy storage systems a game-changer. This article explores how modular battery solutions address ...

Located at Hjeltefjorden outside Bergen, it offers a unique setting for establishing climate-friendly industries with a strong focus on low carbon emissions. The site provides short-distance ...

In 2022, a 20 MW battery storage project was deployed near Bergen's Aurland hydropower plant. The system stores excess hydropower during low demand and releases it during peaks, ...

The first phase of the Northern Lights Phase 1 project, valued at \$710 million, reached FID in May 2020. Northern Lights is part of the ...

Alongside the agreement signing, a dozen Swiss companies and other stakeholders announced pilot projects to rapidly implement the new framework. Mr R&#246;sti ...

Norway has launched the world's largest full-scale operation of industrial carbon capture and storage, ploughing billions of dollars of ...

If the world - and Europe - are to achieve their climate targets, a wide range of climate measures are needed, including large-scale ...

Located in the Northern Temperate Zone, Bergen, Vestland, Norway exhibits a unique seasonal variation in solar energy production. During the summer season, each kilowatt of installed ...

Norway launched on Tuesday a flagship carbon capture and storage (CCS) project, a technology seen as

crucial to curbing climate ...

Norwegian researchers have demonstrated an ingenious underwater energy storage system that uses the immense pressure of the deep sea to deliver electricity on demand. This ...

Norwegian energy company BKK is an early customer of the Voltpack Mobile System - Northvolt's first scalable, redeployable battery energy storage ...

The Northern Lights CO<sub>2</sub> transport and storage facility, in &#216;ygarden, near Bergen, Norway, was officially opened on 26 September. It is a joint venture between Equinor, Shell ...

Norway is taking a historic step in the fight against climate change as the world's first full-scale value chain for carbon capture and storage (CCS) is now being launched. The ...

Northern Lights offers CO<sub>2</sub> transport and storage as a service. Our mission is to enable the reduction and removal of industrial emissions in Europe.

You know how people say solar and wind power are too unpredictable? Well, Oslo's new 150-meter deep storage shafts might've just cracked the code. As of March 2025, ...

On September 26, Norwegian Minister of Energy Terje Aasland led the official opening of the Northern Lights CO<sub>2</sub> transport and storage facility in &#216;ygarden, near Bergen.

Located at Hjeltefjorden outside Bergen, it offers a unique setting for establishing climate-friendly industries with a strong focus on low carbon ...

The Northern Lights CO<sub>2</sub> transport and storage facility, in &#216;ygarden, near Bergen, Norway, was officially opened on 26 September. ...
