-----  
Why should you choose Off-Grid Europe?

Solar-powered cooling halls that fight food waste and boost local economies. Our smart software that optimizes performance and extends system life. Durable energy solutions excelling in harsh conditions and large-scale delivery Innovation is at the heart of Off-Grid Europe.

Can Off-Grid Europe and off-grid Africa have 24/7 power without diesel?

"I want to express my sincere gratitude to all Off-Grid Europe and Off-Grid Africa team members for their hard work and commitment. Now our factory can have 24/7 power without diesel, saving about 40% in costs per year. This achievement is not only a success for today but also a strong reference point for the challenges and opportunities ahead."

Why should we invest in Europe's electricity grid?

Investing in Europe's electricity grid is about more than just money; it would lower investment risks, attract private capital and secure a steady, sustainable flow of funding for electricity infrastructure upgrades. Additionally, they could help to mitigate substantial short-run tariff hikes, ensuring that the transition to a modernized grid

What services does off-grid Africa offer?

All done by our local Off-Grid Africa team. Our financial services support customers in funding and managing projects. We are able to advise on project finance, export finance, and collaborative financing models to de-risk access to renewable energy systems and to enhance economic feasibility.

Rising electricity prices, uneven grid load, and stricter carbon emission controls necessitate more efficient and economical energy strategies while ensuring production continuity.

Industry electricity prices ranged from 0.01 U.S. dollars per kilowatt-hour in the Middle Eastern countries to
