Who owns all components of a unit of energy property?

Ownership of All Components of a Unit of Energy Property. The final regulations retain the rule in the proposed regulations that a taxpayer must directly own at least a fractional interest in the entire unit of energy property (and not just a component of the energy property).

How will the proposed regulations change the definition of solar energy property?

The Proposed Regulations would amend the definition of "solar energy property" so that it no longer includes storage devices. In addition, as noted below, the Dual Use Rule is no longer relevant to determining the eligibility of energy storage technology placed in service after December 31, 2022. Qualified Interconnection Property

Does a retrofitted unit of energy property qualify for service?

The Proposed Regulations would apply the so-called "80/20 Rule" to determine whether a retrofitted "unit of energy property" qualifies as originally placed in service even if it contains some used components of property.

What is an energy project?

An energy project is defined as property that qualifies for the energy credit based on its components, functionality, and compliance with statutory requirements. Components include equipment such as storage devices, power conditioning units, and transfer equipment integral to generating or utilizing energy.
