Which solar financing option has the lowest electricity bill savings?

Lowest electricity bill savings: Out of all the financing options, PPAs and leases have the lowest solar savings. Homeowners don't get incentives: Any solar incentives or rebates go to the solar company, not the homeowner, since the company owns the system.

How do you pay for a solar system?

There are three main ways to pay for your home solar system: upfront with cash, a solar loan, or through a lease or power purchase agreement (PPA). If you can't afford to pay for your system out of pocket--or don't want to tie up that capital--solar financing allows you to spread the cost over time through a loan or lease.

Should you buy solar panels with cash?

Cash purchases give you the best return on investment, immediately increase your home's value, and give you the most freedom. Solar panels purchased with cash have the best solar savings because you don't have to worry about paying interest, monthly payments, or additional fees that come with other types of financing.

Should you pay for solar?

The way you pay for solar directly impacts your total savings and how quickly you'll break even on your investment. Whether you have cash on hand, prefer monthly payments, or want to keep your capital available for other opportunities, there's a financing option designed for your situation. Most homeowners save around \$50,000 over 25 years
