Should you buy a portable power station?

Whether using a portable power station at home, camping, or on the jobsite as a power tool recharging station, it's vital to invest in a product that will withstand any method of transportation and any possible impact damage that could occur.

How often should a portable power station be re-upped?

While all portable power stations should have their power re-upped on a regular basis (plan for every three months), my testing showed that some portable power stations did a better job of retaining power over that period of time than others.

Can you use a portable power station as a ups?

Yes, a portable power station can be used as an uninterruptible power supply. Many portable power stations come with UPS features, like automatic switchover when power loss is detected.

How do I choose a portable power station?

Power stations represent a significant investment, both financially and in terms of the physical space they occupy. Therefore, it is crucial to ensure that you are selecting a model that meets your specific needs. This involves carefully considering several factors: Weight: In the realm of portable power stations, bigger isn't always better.

After researching and testing dozens of portable power stations over the past seven years, we found that the River 2 Pro easily stands out from the competition.
