-----  
How many battery swap cabinets are there?

With rich industry experience, we have deployed more than 5,000 battery swap cabinets and put into use 65,000+ smart lithium batteries, providing convenient services for drivers in more than 35 countries around the world, helping clients build a profitable and scalable battery swap business.

What is a battery swap station?

Designed for fleet management, shared mobility services, and personal use, battery swap stations are a sustainable alternative to traditional charging methods. With a focus on smart technology, these stations offer automated, eco-friendly, and scalable solutions that support the growing demand for green transportation.

What certifications does a swap battery maker have?

All the batteries, battery cabinets, electric motorcycles and swap station systems will be operational tested and inspected before leaving the factory, which allows us to ensure that a set of samples can operate and swap. Our swap battery makers has done these certifications: CE, MSDS, UN38.3, FCC, UL, ROHS, BIS certification

Why do you need an electric motorcycle battery swap cabinet?

The electric motorcycle battery swap cabinet has been the perfect fit. Its modular design allows us to add more cabinets as our fleet expands, without requiring any major infrastructure changes. This scalability feature has saved us significant costs and allowed us to easily accommodate our growing number of electric motorcycles.

Shared battery swapping cabinets incorporate multiple safety features, including thermal management systems, overcharge protection, short-circuit prevention, and robust ...

Battery swap cabinets address this issue by allowing users to replace batteries within minutes, significantly reducing vehicle downtime and improving operational efficiency. ...
