-----  
What is a lithium-ion battery charging cabinet?

The lithium-ion battery charging cabinet is built using all-welded, 18-gauge (1mm) steel and includes a double wall with 1.5" (38mm) of insulating air space to absorb the energy of high temperature battery failures for improved fire safety.

How many batteries can be stored in a GFCI cabinet?

A dedicated 10VAC/60Hz GFCI supply using a minimum 14 gauge cord is required (not included). The total number of batteries that can be safely stored and charged in the cabinet will vary based on the amount of energy in each battery. The cabinet's Total Energy Containment Rating (TECR) is 2kWh.  $2,000 / (V \times Ah) =$  number of batteries.

Who can use the e-bike charging station?

Each compartment has a power module with two fused sockets. In addition to business and public authorities, schools, universities, airports, restaurants, cafés, hotels and other public buildings can also be equipped with the e-bike charging station for outdoor use.

How much weight can a Li-ion charging cabinet hold?

The safety charging cabinet also comes with one adjustable shelf with a weight capacity of 65 lbs and is approximately 2" thick. An 8-receptacle surge protected power strip is located inside the Li-ion cabinet to plug in your charging devices.

LISTA electrical cabinets are perfect for the safe, personal storage of battery-powered devices of all kinds. These robust all-rounders are ideal for offices and administrative functions, schools, ...

Through continuous innovation and technological upgrades, Toyon can provide customers with efficient, reliable, and environmentally friendly new energy products and services, making a ...
