How many solar power plants are there in Russia?

Insolation map of Russia (Map of Insolation of Russia,2019). At the beginning of 2020,thirteen solar power plantswith a total installed capacity of more than 300 MW are already operating in this region (Solar Power Plants in the Orenburg Region,2019).

How much does a solar power plant cost in Russia?

According to Russian suppliers for solar power plants (altecology.ru,2019; Solar controller,2020),the average cost of equipment for solar power plants with an installed capacity of 10 MW is 310 million rubles.

Can a lithium-ion storage network increase the efficiency of the SPP?

Based on the results of the analysis of the distribution of peak load hours and maximum power generation in the Orenburg region,it was decided that to increase the efficiency of the SPP,it is possible to use lithium-ion storage network energy storage units with a capacity of 10 MWh.

Is the Orenburg region a good place to invest in solar energy?

The Orenburg region is one of the long-term leadersamong the regions of Russia,not only in terms of the potential of solar energy (about 300 sunny days a year) (Kommersant,2020; Rambler,2020) (Figure 5),but also in terms of the rate of development of this sector in the country. FIGURE 5.
