Can you get incentives to install solar on your property?

On-site solar: Homes, businesses, multifamily buildings, and municipalities can get incentives to install rooftop or ground-mounted solar on their property to generate their own renewable energy.

How many rooftop solar projects are there in 2024?

In 2024, DCAS assessed all City-owned buildings larger than 10,000 gross square feet for solar readiness and identified nearly 29 MW of rooftop solar potential. As of 2024, the Clean Energy Program has over 40 MW of solar PV projects in progress, and 30.5 MW of completed installations.

Is solar a good investment in New York State?

New York State is making solar energy more accessible to homes, businesses, and communities through NY-Sun incentives and a network of qualified installers. Combined with declining equipment costs, New York State tax credits, and Inflation Reduction Act tax credits for commercial solar, going solar is a great option.

How do I choose a solar contractor in New York State?

Community solar: Renters, homeowners, businesses, and other customers can tap into solar power generated in New York State without installing panels through community solar. Review approved solar contractors in your area and best practices when choosing a contractor to install solar at your home, small business, or multifamily building.
