Deciding where solar projects will be installed is one of the very first decisions to be made in a project development timeline. Explore the many factors to consider when selecting a site.

The U.S. Large-Scale Solar Photovoltaic Database provides the locations and array boundaries of U.S. photovoltaic facilities, with capacity of 1 megawatt or more.

The Major Solar Projects List is a database of all ground-mounted solar projects, 1 MW and above, that are either operating, under construction or under development.

Over 190,000 sites for solar, wind, biomass, and geothermal energy. Search data by attributes including state, acreage, renewable energy capacity, distance to nearest ...

Start exploring solar potential by clicking on the map. Select sites, draw rectangles or polygons by clicking the respective map controls. Calculate energy production for selected sites. The ...

Solar power in the United States Solar panels on a rooftop in New York City Community solar farm in the town of Wheatland, Wisconsin [1] Solar power includes solar farms as well as local ...

In this article, we will delve into the top locations for solar energy development in the U.S., highlighting key considerations for choosing the best sites. While deserts may seem ...

Top biggest solar PV stations in the United States 2024. PV parks, PV farms. (Updated September 2024) Get familiar with our list of the largest US-based solar photovoltaic plants ...

Based on interconnection data, this map represents the most comprehensive summary available of installed solar capacity and annual trends, including projects that did not receive State ...

Solar power generation sites
