-----

SERMATEC has launched an innovative 5.1MW/17.8MWh commercial and industrial energy storage system in Bulgaria. This groundbreaking project is set to transform ...

Bulgarian companies put 481 renewable electricity plants into operation in 2024, adding 938 MW, according to the Electricity System Operator (ESO), Capital.bg reported. Of ...

The new solar generator in Oryahovo combines over 100,000 PV modules with 107 MWh of energy storage, supporting energy trading ...

Our first wind farm was built and commissioned in 2012, in line with Bulgarian and EU energy strategy for increasing the share of distributed renewables ...

Solar power generated 12% of Bulgaria's electricity in 2023. By the end of 2020 about 1 GW of solar PV had been installed. It has been estimated that there is potential for at least another 4 GW by 2030. By the end of 2024 about 3.9 GW of solar had been installed. On March 13, 2023, peak photovoltaics power was 30% of Bulgaria electricity ...

In 2023, Romania also witnessed a record-breaking year for solar, adding over 1 GW of new capacity through distributed generation and utility-scale projects. This marked a ...

Bulgaria's energy generation includes nuclear energy, solid fuels, such as lignite, as well as small quantities of gas. The role of renewable energy sources (wind, solar, biomass, and hydro) has ...

The Bulgarian solar energy sector is witnessing a remarkable transformation as the country's solar power capacity surges past expectations, with the biggest photovoltaic parks ...

Energy in Bulgaria Kozloduy Nuclear Power Plant is the largest power plant of Bulgaria. Energy consumption by source in Bulgaria Energy in Bulgaria is among the most important sectors of ...

Bulgaria's government outlines plans for renewable energy, yet lacks concrete strategies for rooftop solar installations despite the country's high solar potential. While a draft strategy ...

Lyaskovets, Bulgaria, (ANTARA/PRNewswire)- SERMATEC, a pioneer in renewable energy solutions, has launched an innovative ...

Solar PV: Solar resource potential has been divided into seven classes, each representing a range of annual PV output per unit of capacity (kWh/kWp/yr). The bar chart shows the ...

Bulgaria solar power connect to grid Bulgaria will connect up to 1,500 MW of new solar capacity to the grid in 2024, according to Dimitar Zarchev, director of the Central Dispatch Office of ...

The new solar generator in Oryahovo combines over 100,000 PV modules with 107 MWh of energy storage, supporting energy trading and strengthening Bulgaria's power grid.

Solar power in Bulgaria was expanded by 100 megawatts (MW) in 2011. A 16.2 MW solar power plant in Zdravetz, Bulgaria was expected to be completed in June 2012, with power being sold ...

For the first time in Bulgaria's history, solar energy production surpassed national electricity consumption during a specific time window.

The Verila project, which is being built in hilly terrain south of Sofia, will increase solar power generation in the country by 12 percent.

Bulgaria's energy sector is at a critical juncture, with two main objectives shaping its direction: decarbonization and reducing reliance on Russian energy. Over the past year, ...
