Can off-grid solar PV be a game-changer for rural electrification in South Asia?

Off-grid solar PV emerges as a game-changer for rural electrification and a catalyst for sustainable agricultural development in South Asia. Governments and development agencies can prioritize investments in solar PV systems to address energy poverty and boost agricultural productivity. 1. Introduction

Does South Asia need an energy transformation?

South Asia needs an energy transformation, shifting from scarcity to abundance. Renewable energy, like solar home systems (SHS), can fuel both economic growth and agricultural development, tackling the dual challenge of limited resources and poor energy access [82,80].

Are solar home systems a viable alternative to the National Grid?

Renewable energy, like solar home systems (SHS), can fuel both economic growth and agricultural development, tackling the dual challenge of limited resources and poor energy access [82,80]. Notably, SHS outperform the national grid in service quality, making them a potent solution (Groh et al., 2016).

Can off-grid solar energy solve rural energy challenges?

Off-grid solar energy emerges as a promising solution for addressing energy challenges in rural villages, given its freedom from fuel transport costs and relatively straightforward installation.
