How does South Sudan import electricity from Sudan?

South Sudan imports a small amount of electricity from Sudan through a 32 MW/220 kV interconnector in Upper Nile State that distributes power to local customers through the Renk substation, but the supply from this line has been unreliable due to the power shortage in Sudan.

What is the energy access rate in South Sudan?

South Sudan has one of the lowest energy access rates in Sub-Saharan Africa and in the world. While 46 percent of Sub-Saharan Africa's population now has access to electricity, the energy access rate in South Sudan is estimated to be only 5.3 percent based on recent World Bank-funded primary research.

Where is South Sudan's electricity supply & distribution infrastructure located?

Most of South Sudan's functioning electricity supply and distribution infrastructure is located in Juba, with very little working equipment in other cities and rural areas.

Does South Sudan have a transmission network?

South Sudan does not have a transmission network, and even before the conflict, the power system consisted entirely of isolated distribution grids.
