-----  
How will the European Commission support large-scale energy storage in Spain?

The European Commission on Monday approved a new aid scheme for the deployment of large-scale electricity storage in Spain. Subsidies will be available for standalone energy storage sites, projects installed alongside renewable energy facilities, and storage planned as part of thermal power plants.

Will Spain be able to deploy large-scale electricity storage?

The European Commission has approved a new aid scheme that will allow Spain to deploy large-scale electricity storage, both in hybridisation with renewable energy facilities and stand-alone and thermal.

What is energy storage in Spain?

It targets large-scale energy storage projects in Spain. It focuses on technologies like standalone battery energy storage systems (BESS), pumped hydro energy storage (PHES), and thermal energy storage. The program supports hybrid projects, which combine storage with renewable energy, such as solar or wind farms.

Can Spain deploy large-scale energy storage with co-financing of 85%?

The European Commission on Monday greenlit a new aid scheme to enable Spain to deploy large-scale energy storage with co-financing of up to 85%. The European Commission on Monday approved a new aid scheme for the deployment of large-scale electricity storage in Spain.

These projects are expected to add 2.2 gigawatts of generation capacity and 9.4 gigawatt-hours of storage capacity to Spain's grid. The renewable energy sources paired with ...

Image: Iberdrola. Spain has increased its energy storage target by 2030 to 22.5GW in the latest update of its National Energy and ...

The European Commission on Monday approved a new aid scheme for the deployment of large-scale

electricity storage in Spain. Subsidies will be available for ...

This article explains what the program involves, how energy storage benefits the grid and environment, the market opportunities it creates, and who will benefit from this major ...

The European Commission has approved a new aid scheme that will allow Spain to deploy large-scale electricity storage, both in ...

Spain's battery storage program expanded to EUR840M, funding 143 projects totaling 8.9GWh. Learn how this initiative creates opportunities for solar-storage hybrids and boosts ...

Spain has awarded more than EUR818 million (\$956.3 million) in European Union funding to 126 energy storage projects totaling 2.2 GW of power and 9.4 GWh of capacity.

Hybrid storage projects are primarily paired with renewable generation, with solar power involved in 38 projects and wind power in 18 projects. Furthermore, nine projects ...

Energy storage has experienced an unprecedented boost in Spain during the third quarter of 2025. According to data from the Renewable Energy Observatory, prepared by ...

Officials have discussed fast-tracking BESS projects, including providing special grid connection routes, as Spain looks to build ...

Spain's MITECO issued positive EIS for three energy storage projects during the week starting Nov. 9, 2024. The Gecama site features ...

Iberdrola will deploy battery storage (BESS) projects in Spain adding up to 150MW/300MWh, to be co-located with existing PV plants.

Spain will allocate EUR 50 million (USD 58.6m) in grants to help power and heat production plants replace fossil fuels with renewable sources under a new support programme ...

This article explains what the program involves, how energy storage benefits the grid and environment, the market opportunities it ...

What future does energy storage hold in Spain? Projects, regulations, and the key role after the nuclear shutdown.

The European Commission has approved a new aid scheme that will allow Spain to deploy large-scale
