---

Suriname's long-awaited offshore oil boom, anchored by TotalEnergies' GranMorgu project, promises economic relief but faces mounting geological, financial, and timing challenges.

Get report on investigation near-miss Four Firefighters Injured In Lithium-Ion Battery Energy Storage System Explosion - Arizona

Lithium-ion batteries (LIBs) have been extensively used in electronic devices, electric vehicles, and energy storage systems due to their high energy density, environmental ...

A new report, commissioned by APS, reveals what led up to the explosion at one of their battery storage facilities on April 19, 2019.

This paradox forms the core challenge for South America's hidden renewable energy gem. The government's recent National Energy Transition Plan 2024 aims to flip this script through ...

This review highlights the latest advancements in thermal energy storage systems for renewable energy, examining key technological breakthroughs in phase change materials ...

SERVODAY's Boiler Fuel Storage & Feeding System is designed for efficient energy conversion from biomass fuels in Suriname, ensuring consistent and controllable feeding for optimal boiler ...

Suriname is facing an ongoing energy crisis as low water levels in the Van Blommenstein Reservoir reduce hydro-energy production. ...

About EPRI's Battery Energy Storage System Failure Incident Database The database compiles information about stationary battery energy storage ...

Blog Battery Energy Storage System (BESS) fire and explosion prevention Battery Energy Storage Systems (BESS) have emerged as crucial ...

Suriname is facing an ongoing energy crisis as low water levels in the Van Blommenstein Reservoir reduce hydro-energy production. Experts in hydrology, business, and ...

Welcome to Suriname--a nation racing to balance ecological preservation with modern energy demands. With global lithium battery prices dropping 89% since 2010, this ...

Diversification of Suriname's energy mix with solar and hydro energy will boost the country's energy security by reducing its reliance on costly imported fossil fuels.

Several gas developments are underway in Guyana and Suriname that could offer new competitive LNG supply sources early next decade.

In addition to the construction of the Suriname's first FPSO (Floating Production Storage and Offloading), SBM Offshore secured the operations and maintenance contract for it ...

Energy storage systems are growing worldwide. Explore the challenges of explosion protection for ESS systems.

In 2023, a battery storage facility explosion in Paramaribo shook Suriname's renewable energy sector, highlighting critical gaps in safety and infrastructure. This incident has sparked debates ...

Read how the recent Arizona energy storage fire happened, and what can be done to prevent such fires from happening again.
