What is Japan's green transformation plan?

Japan's Green Transformation (GX) Plan is a bold new strategy aimed at transitioning the world's fourth largest economy away from fossil fuels and toward cleaner energy sources. Equally ambitious financing should catalyze investments across diverse smart energy solutions, from renewables and smart grids to smart cars and energy-saving equipment.

What is Japan's energy storage policy?

As policy, technology, and decarbonization goals converge, Japan is positioning energy storage as a critical link between its climate targets and energy reliability. Japan's energy storage policy is anchored by the Ministry of Economy, Trade and Industry (METI), which outlined its ambitions in the 6th Strategic Energy Plan, adopted in 2021.

How is Japan's energy storage landscape changing?

Japan's energy storage landscape is shifting, pushed by household demand, corporate ESG mandates, and domestic battery manufacturing. The residential lithium-ion market, projected to grow at a CAGR of 33.9% through 2030, remains one of the fastest-expanding segments.

When will Itochu launch its first energy storage station?

Going forward, the plan is to launch the first energy storage station around fiscal 2025, and then proceed with the development and operation of energy storage stations one after another. ITOCHU has developed a product lineup that meets market needs, from home storage batteries to large-scale energy storage systems for industrial and grid use.

LS Electric will deploy a 20MW/90MWh battery storage system in Japan after it was awarded the contract through a competitive ...

It is Japan's first fund exclusively for energy storage that invests in, develop and operate new energy storage plants, including those equipped with renewable energy facilities, ...

On February 18, 2025, the Japanese Cabinet approved the Seventh Strategic Energy Plan. This Strategic Plan was formulated in a manner ...

The Tokyo Energy Storage Phase II project isn't just another battery installation; it's sort of the linchpin for Japan's 2030 carbon neutrality goals. By 2026, this 820MWh facility will store ...

Integrating the Tokyo Gas Group's corporate sales, we tackle the areas of on-site energy services, district heating and cooling and smart energy networks, engineering, and gas ...

Smart Energy Week gathers a full range of renewable energy technologies such as hydrogen and fuel cells, solar power, rechargeable ...

As Japan accelerates its renewable energy adoption, high power energy storage machine brands are scrambling to power this transformation. In 2025 alone, the market is projected to grow by ...

Battery storage developer Eku Energy has partnered with utility Tokyo Gas on a grid-scale energy storage project in Japan, with construction expected to start soon.

Currently, the TMG is advancing and accelerating several initiatives related to energy efficiency and renewable energy, setting new ...

A country with limited fossil fuels, frequent earthquakes, and a post-Fukushima energy identity crisis. Now imagine it leading the global charge in renewable energy storage. ...

Japan currently has three major pumped hydro projects in various stages of completion, including one serving Tokyo that will have the world's third-largest pumped ...

While IAMs excel in depicting energy-economic-environment systems both globally and nationally, and in analyzing the impacts of emission reduction strategies on climate ...

Japan currently has three major pumped hydro projects in various stages of completion, including one serving Tokyo that will have ...

Discover how Japan's EUR1T GX Plan is driving smart energy innovation and clean growth across Asia with bold investments in green ...
