How much space does a data centre rack take up?

In data centres, a typical full-sized rack cage is 42U high and either 19 or 23 inches wide. The individual pieces of equipment held on these racks are usually anywhere from 1U to 4U high. Most rack-mount servers take up 1-2 U of space. The term half rack can be used to refer to:

How deep is a data center rack?

The standard Data Center Rack has a 4 ft depth and 2 ft width which means it occupies 1 floor tile in width and 2 in depth. This isn't always the case. Many server racks have a 3 ft depth and 2 ft width which is what popularized the "7-tile pitch" (seen in the photo above) a reality.
