Does Uzbekistan need energy storage?

By 2030, Uzbekistan aims to source over 40% of its electricity from renewables, demonstrating its commitment to sustainability. The plan also includes advancing energy storage, with a 300 MW lithium-ion system debuting in 2024 and a goal of 4.2 GW storage capacity by 2030. *The Role of Energy Storage in Renewable Energy*

Why is Uzbekistan so energy-intensive?

Uzbekistan remains one of the most energy-intensive economies in the world. Energy use is largely based on fossil fuels, although the country has significant RE potential in solar and wind. Natural gas makes up to 83 percent of total primary energy consumption and more than 80 percent of the electricity mix.

How much electricity does Uzbekistan need?

According to projections, Uzbekistan will require 117 billion kilowatt-hours of electricity by 2030, increasing to 135 billion kilowatt-hours by 2035--1.7 times the current consumption. To meet these demands, the Ministry of Energy has developed a long-term strategy focused on infrastructure development and efficiency improvements.

How will Uzbekistan improve electricity production?

The government plans to invest \$4 billion in the National Electric Grid of Uzbekistan over the next five years to facilitate these projects. Reducing electricity production costs is another major priority, with a particular emphasis on alternative energy sources.

Solar Energy Policy in Uzbekistan: A Roadmap - Analysis and key findings. A report by the International Energy Agency.

Tashkent, January 29, 2025 - The Europe Today: President Shavkat Mirziyoyev chaired a meeting on January

28 to discuss measures for developing Uzbekistan's electricity sector for ...

By 2030, Uzbekistan aims to source over 40% of its electricity from renewables, demonstrating its commitment to sustainability. The ...

The Minister also emphasized that in 2025, the country plans to commission an additional 3.5 gigawatts of renewable energy capacity, as well as 1.8 gigawatts of energy ...

TASHKENT HOUSEHOLD ENERGY STORAGE POWER SUPPLY Uzbekistan energy profile - Analysis and key findings. A report by the International Energy Agency. Through these 14 ...
