A completion ceremony for the "Kurokiyama Solar Power Generation Installation Project" was held on April 22, 2025, after the construction work by Mitaden Co., Ltd. ...

Canadian Solar has said its project development arm has a pipeline of more than 27GWh of battery storage projects, while its system integrator business has a pipeline ...

An off-grid hybrid energy system at Fekola, a gold mine in Mali, Africa, has gone online incorporating solar PV, battery storage and the site's existing fossil fuel generators, ...

Sumitomo Electric has inaugurated a vanadium redox flow battery (VRFB) system at a community solar microgrid in southern Japan.

Why Choose EK SOLAR for Vanadium Battery Solutions? With over a decade of expertise, EK SOLAR specializes in custom vanadium energy storage systems tailored to commercial and ...

Discover why Vanadium Redox Flow Batteries excel for large-scale energy storage with safety, scalability, and long lifespan.

Vanadium nitride, one of the transition metal nitrides, has been applied in the semiconductor industry and energy storage fields. Wang et al. investigated the partial ...

Flow batteries can feed energy back to the grid for up to 12 hours - much longer than lithium-ion batteries, which only last four to six ...

Last week Energy-Storage.news reported that details of the first project by another new market entrant, Largo

Website: <https://www.afrinestonline.co.za>

Clean Energy, have been announced by customer Enel Green ...

A Madrid-headquartered developer has proposed a solar-plus-storage system in Spain with a 100MW/200MWh battery energy storage system (BESS). A request for ...

Europe's largest vanadium redox flow battery has reached a breakthrough in renewable energy storage.

Rongke Power China has just brought the world's largest vanadium flow battery energy project online, marking a massive milestone in long-duration grid-scale energy storage.

You're sipping coffee made from a solar-powered espresso machine while your smart home runs entirely on wind energy captured overnight. Sounds like sci-fi? Not anymore. Enter vanadium ...

Phase 1 of the Yongren vanadium flow battery (VFB) energy storage project has been successfully completed and connected to the grid on 31 December 2025, marking a ...

A completion ceremony for the "Kurokiyama Solar Power Generation Installation Project" was held on April 22, 2025, after the ...

Almost all have a vanadium-saturated electrolyte--often a mix of vanadium sulfate and sulfuric acid--since vanadium enables the highest known ...

Why Vanadium Batteries Are Stealing the Energy Storage Spotlight If you're looking for the next big thing in energy storage, vanadium might just be the "van" you want to hitch a ...

A giant solar-plus-vanadium flow battery project in Xinjiang has completed construction, marking a milestone in China's pursuit of long ...
