Why did energy dome choose Victoria?

The Italian company selected Victoria due to our net-zero targets and the collaborative nature of the local energy industry. They will explore potential projects in regional Victoria to set up the company's unique carbon dioxide (CO₂) battery technology. Energy Dome's groundbreaking CO₂ battery is efficient and cost-effective at storing energy.

Why should Victoria move from coal-fired power to energy dome?

This is well-suited for Victoria's transition away from coal-fired power, combined with its significant industrial energy demands. Energy Dome is close to completing its world-first commercial-scale CO₂ Battery in Sardinia. Energy Dome's APAC Headquarters in Melbourne builds on the strong sister-city relationship between Milan and Melbourne.

Why is energy dome establishing an APAC team in Victoria?

Energy Dome has identified critical advantages in establishing our APAC team in Victoria to lead the deployment of the CO₂ Battery, and the Victorian Government's support will enable us to accelerate our expansion in the state.

Q CELLS is one of the world's largest and most recognized photovoltaic manufacturers for its high-performance, high-quality solar cells and modules, manufactured in the U.S., South ...

Looking for a reliable, modular, and scalable battery energy storage system? PowerPlus Energy has you covered. Our all-weather suited systems are made with readily accessible ...

Energy Vault ® develops and deploys utility-scale energy storage solutions designed to transform the world's approach to sustainable energy storage. The Company's ...
