What can a solar power kit do for You?

Extend the range and coverage area of a telecommunications network to hard-to-reach and remote locations with our solar power kits. Our kits can be scaled to power any equipment necessary, and we also offer a variety of data backhauling options in order to strengthen connections.

Why are telecommunications providers turning to solar?

That's why telecommunications providers--both wireless service providers as well as BTS tower operators- are turning to solar PV and PV/Hybrid (PV + a secondary energy source) power solutions to achieve their business objectives. Unlike generators and wind turbines, photo-voltaic (PV) solar has no moving parts--so consequently, no downtime.

What is a solar battery box?

This product is perhaps more commonly called a "solar battery box" but is also referred to as a "pole mount battery box". Some battery boxes are large enough to be considered battery cabinets and are usually made from painted steel. Battery enclosures keep your batteries safe from weather and safe from theft.

What matters most in remotely powered telecommunications installations?

In remotely powered telecommunications installations, what matters most is efficiency and reliability. Efficiency is paramount for systems that may need as much autonomy as possible to get through long stretches without sunlight or refueling.

Finding comprehensive technology services in Victoria, TX can be difficult. We believe you deserve the best products and services available, which ...
