What does Vietnam's Solar Policy update mean for energy storage?

Vietnam's solar policy update highlights growing role of energy storage. (Photo: iStock) Vietnam's Ministry of Industry and Trade (MOIT) has announced a new round of feed-in tariffs (FIT) for solar power, introducing location-based pricing and, for the first time, incorporating energy storage systems.

How much does a solar project cost in Vietnam?

Overall, projects with storage receive higher FIT rates. Previously, Vietnam's FiTs were relatively low. In January 2023, the top rate was NT\$1.49/kWh for ground-mounted solar and NT\$1.89/kWh for floating solar, with no regional or storage-based distinctions.

What are the conditions for solar storage in Vietnam?

Conditions for systems with storage include a minimum storage capacity of 10% of the solar plant's installed capacity, a charge/discharge time of 2 hours, and at least 5% of total generation used for charging the storage system. Overall, projects with storage receive higher FIT rates. Previously, Vietnam's FiTs were relatively low.

How much solar power does Vietnam need?

Solar power capacity targets have been raised to between 46,459 MW and 73,416 MW. BESS capacity will support this growing share of solar and wind power in Vietnam's energy mix, helping to stabilize the grid and manage peak demand.

One of the key highlights of Vietnam's revised Power Development Plan VIII (PDP8) is the significant increase in the targets for Battery Energy Storage Systems (BESS). The original ...

Conditions for systems with storage include a minimum storage capacity of 10% of the solar plant's installed capacity, a ...

A strategic analysis of Vietnam's energy future: why Battery Energy Storage Systems (BESS) will decide enterprise competitiveness by 2026, and how SolarBK is shaping ...

Last week, our Managing Director Thomas Jakobsen joined two high-level panels at the annual Solar & Storage Live Vietnam 2025, ...

Vietnam's Ministry of Industry and Trade (MOIT) has announced a new round of feed-in tariffs (FIT) for solar power, introducing ...

With global costs for solar, wind, and battery storage systems continuing to fall, Vietnam could replace fixed FiTs with transparent auctions, enabling clean energy ...

A prime example is its partnership with Petrolimex, Vietnam's largest fuel retailer, to pilot rooftop solar combined with battery storage at ...

Alongside Mongolia and Cambodia, Vietnam will receive technical and financial support to promote energy storage solutions - a ...

A prime example is its partnership with Petrolimex, Vietnam's largest fuel retailer, to pilot rooftop solar combined with battery storage at fuel stations along national highways.

One of the key highlights of Vietnam's revised Power Development Plan VIII (PDP8) is the significant increase in the targets for Battery Energy ...

With global costs for solar, wind, and battery storage systems continuing to fall, Vietnam could replace fixed FiTs with transparent ...

The promotion effect of direct-current charging piles on EV sales is twice that of alternating-current charging piles in the one-year simulation of our model. Increasing the ...

Explore Vietnam's growing demand for solar battery storage across residential and commercial sectors. From home backup systems ...

The parking shed can accommodate as many as 890 vehicles, and will incorporate charging piles and energy storage to realize power storage and charging. Based ...

The Vietnamese government has approved two new solar power plants and two battery energy storage systems (BESS) in the Nam ...
