Which energy storage facilities will provide Lithuania with instantaneous electricity reserve?

The Government of the Republic of Lithuania appointed Energy cells as the operator of the storage facilities that will provide Lithuania with an instantaneous electricity reserve. Energy cells signed a contract with the winning Siemens Energy and Fluence consortium. Energy storage facilities system design works were started.

How will Lithuania's energy storage system work?

The energy storage system, which will provide Lithuania with an instantaneous isolated operation electricity reserve until synchronisation with the continental European networks (CEN), will be used after synchronisation for the integration of energy produced from renewable sources.

Why is electricity storage important in Lithuania?

Lithuania's system of electricity storage facilities is essential to ensure the security of Lithuania's energy system and its ability to operate in isolated mode.

What is Lithuania's energy strategy?

The Strategy has 4 main objectives - to ensure a secure and reliable supply of energy to all consumers, to achieve 100% climate-neutral energy for Lithuania and the region, to transition to an electricity economy and develop a high value-added energy industry, as well as to ensure the accessibility of energy resources for consumers.
