How much does a 10kW Solar System cost in India?

The 10kW solar system price in India ranges between INR 4.5 lakhs and INR 7 lakhs. This price range includes the solar panels, inverter, and other components required to set up the system, but it does not include the cost of batteries for off-grid systems.

How does a 10kW Solar System work in India?

In India, if you have an on-grid 10kW solar system, you may qualify for net metering. This allows you to sell the excess electricity generated by your system back to the grid, earning credits that can be used to offset future electricity bills. Switching to solar power reduces your carbon footprint and contributes to a cleaner environment.

What is a 10kW Solar System?

A 10kW solar system is ideal for those who want to reduce their dependency on the grid or aim for energy independence. This system can generate a large amount of electricity, which is perfect for medium to large homes, small industries, or businesses that have a consistent energy demand.

How much does an on-grid solar system cost in India?

An on-grid solar system does not require batteries; it utilizes the grid to store excess power. The price of solar power systems without battery in India ranges between INR 4.5 lakhs and INR 6.5 lakhs, depending on the quality of the panels and inverters.
